WORKSHOP

Future-Proofing Your Scientific Career:
Building a Compelling Application

Limited seats available—register now!

PRESENTER
DR. CASSIE BRIGGS

THURSDAY
25 SEPTEMBER 2025

TIME
1:00 - 2:30 PM

PROVIDED
UPON REGISTRATION

It's one thing to understand your professional brand, it's another to translate it into a powerful resume and cover letter that appeals to the reviewer. In this hands-on workshop, you'll take concrete steps to do just that.

With guided exercises and peer feedback, you'll identify the most relevant elements of your brand to emphasize for a given opportunity, draft resume bullet points that highlight value, not just tasks, and shape a cover letter that tells a cohesive and compelling story.

Furthermore, you'll leave with a repeatable process for tailoring future applications, and increased confidence that your materials reflect both your brand (i.e. your 'deliverables') and the likely evaluation criteria (i.e. the organization's 'desirables').

This workshop references concepts introduced in earlier sessions from the "Future-Proofing Your Science Career" series. Prior attendance is helpful but not required—you'll still gain plenty of value even if this is your first event.

***Laptops with internet connectivity required.*

****Bring your resume/CV and a target job ad (digital or printed).*
